Profile

Results oriented Senior Software Engineer with 15+ years of experience delivering high-impact, scalable software solutions. Proven ability to lead teams using Agile methodologies (Scrum, XP), consistently exceeding expectations. Proficient in full-stack development, unit testing, and mentoring. Fluent in English and Spanish.

Skills

Experience *(more experience details [here!](#))*

Senior software developer

04/2021 - 10/2024

Verizon | *Java, React, Angular, JavaScript, CSS3, AEM, BitBucket, Jenkins, AWS, Oracle*

- Implemented 3-D Secure from Cybersource into the Total by Verizon checkout process to address a rising rate of fraudulent transactions. This enhancement resulted in a 15% reduction in fraudulent transactions within the first quarter, significantly improving customer trust and reducing financial losses.
- Built a CCPA compliance application for the TracFone application, ensuring compliance for 6 subsidiaries and protecting the privacy of millions of customers' data

Senior software developer

10/2012 - 02/2021

Vertiv | *Java, React, Redux, Express, Angular, JavaScript, typescript, CSS, AWS, Jest, Selenium, Git, docker*

- Migrated a legacy Oracle ADF application to Angular 8+, drastically reducing maintenance and improving performance and scalability.
- Replaced a legacy Flex application with a modern HTML5 canvas-based visualization, resulting in 3x increase in rendering speed and responsiveness, enhanced cross-browser compatibility, and provided a better user experience.
- Developed a React/Redux (UI) and Express (API services) application enabling users to efficiently manipulate symbols within the Trellis system, improving processing time by over 80% based on user feedback.

Senior java developer

04/2009 - 05/2010

Systems & Solutions | *Java, EJB, Axis 2.0, SQL, Active directory*

- Built an application (IceFaces MVC, EJBs, Apache Axis 2.0) for the Colombian Military managing budget, travel, and per diem expenses. Included database modeling (DAOs and DTOs) and web service development.
- Created PIDEN Mobile, a secure mobile fingerprint identification system for the Colombia's Police Force (Java, Motorola API, Creme VM). integrating with legacy systems via PL/SQL and a dedicated JDBC application. Utilized Oracle ADF for the UI.

Education

- **Major:** Bachelor of Science in Computer Science, 2005
- **Certifications:** Responsive Web Design, Angular, React, Node.js, Redux, Data Structures and Algorithms, WebGL.
